

Profiles Research Networking Software User Guide

The screenshot shows the user interface for the Profiles Research Networking Software at the University of Arkansas for Medical Sciences (UAMS). The page features a navigation menu with links for Search, About / FAQ, Edit My Profile, Login to Profiles, and DIRECT2Experts. A note indicates that Internet Explorer is the preferred browser. The main content area is titled "Search" and offers two search options: "Find People" and "Find Everything". The "Find People" section is active and contains two search methods: "Find people by name, concept, or keyword" and "Find people by name/organization". The first method includes a text input for keywords and a checkbox for "Search for exact phrase", with a "Search" button below. The second method includes input fields for Last Name, First Name, Institution, Department, and Faculty Type, each with a dropdown arrow. There are checkboxes for "All except the one selected" next to the Institution and Department fields, and a "Search" button at the bottom.

Accessing Profiles:

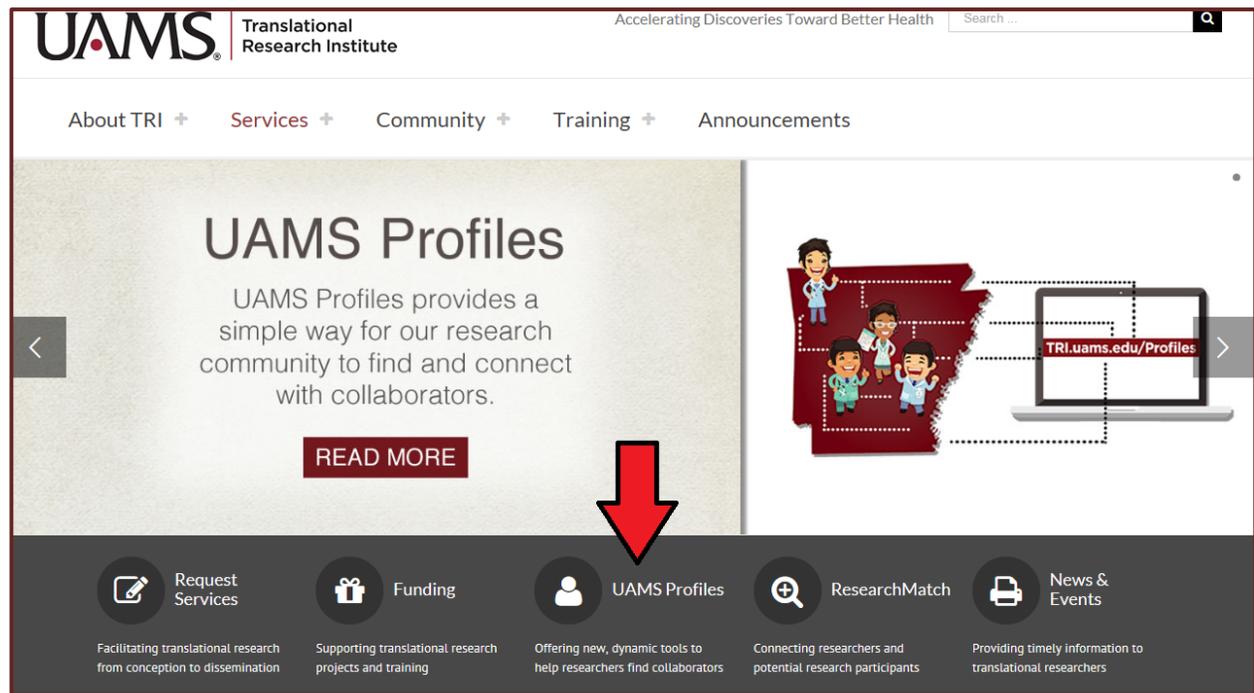

Profiles is accessed through the Translational Research Institute's (TRI) portal, which can be found at <http://tri.uams.edu/>.

There are two ways to enter Profiles:

1. There is a link to Profiles which can be found under the services menu.

2. A link is also provided in the menu directly under the slider on the TRI main page.

It is recommended that you access Profiles using Internet Explorer. Not all Profiles functions are fully supported on other browsers.

Clicking on the Profiles link will bring you to the main search page of Profiles. You do not have to login to use Profiles. You only have to login if you are editing your personal researcher profile.

The screenshot shows the UAMS Profiles search interface. At the top left is the UAMS logo (University of Arkansas for Medical Sciences). Navigation links include Search, About, Edit My Profile, and Login to Profiles. A note indicates the preferred browser is Internet Explorer. The main search area has two tabs: 'Find People' (selected) and 'Find Everything'. Under 'Find people by keyword', there is a text input for 'Keywords', a checkbox for 'Search for exact phrase', and a red 'Q Search' button. Under 'Find people by name/organization', there are input fields for 'Last Name', 'First Name', and 'Faculty Type', and dropdown menus for 'Institution' and 'Department'. Each dropdown has a checkbox for 'All except the one selected'. A second red 'Q Search' button is at the bottom.

Search Functionality:

From the main search page there are two search options. **Under the Find People tab, you can search for people by either keywords, or by their name or organizational affiliations.**

This screenshot is identical to the one above, but with a large red arrow pointing down to the 'Find People' tab, highlighting the search options available under that tab.

Under the Find People tab, you can use the keyword field to search for people by both name and concept. Concepts are research topics and areas of expertise within the medical field (lung cancer, hypertension, depression) that are ontologically linked to researchers through their publications. Searching for a concept will populate a list of people that have conducted research on that topic.

To perform a search, type the name or keyword(s) in the appropriate field and click on the red search button.

Search

Find People Find Everything

Find people by name, concept, or keyword

Keywords x Search for exact phrase

Search

The next page you will see is a list of possible matches to your search. Click on the appropriate choice to view the desired researcher profile.

Search Results (1)

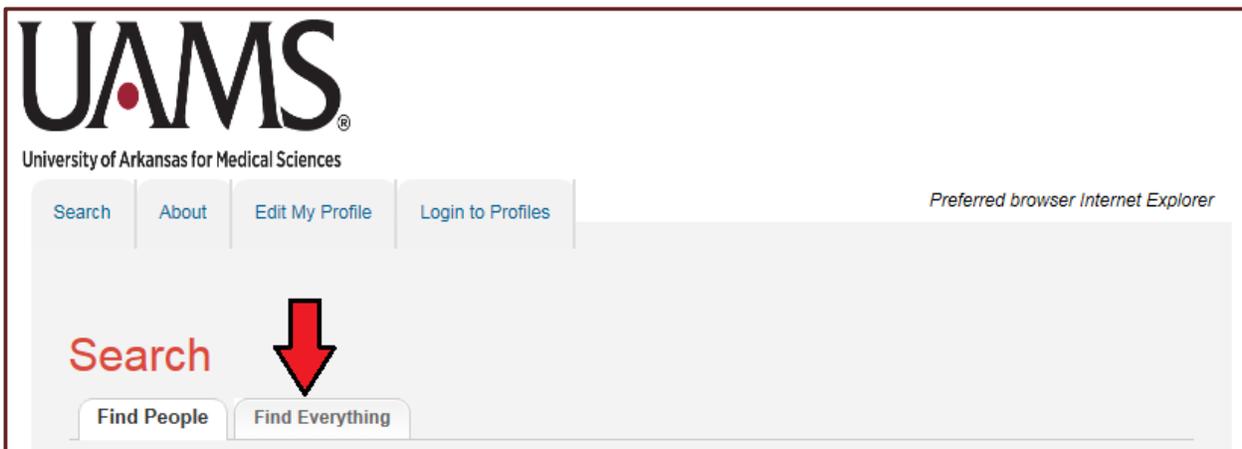

Name	Institution	Why
Nia Indelicato	University of Arkansas for Medical Sciences	Why?

Per Page Page of 1

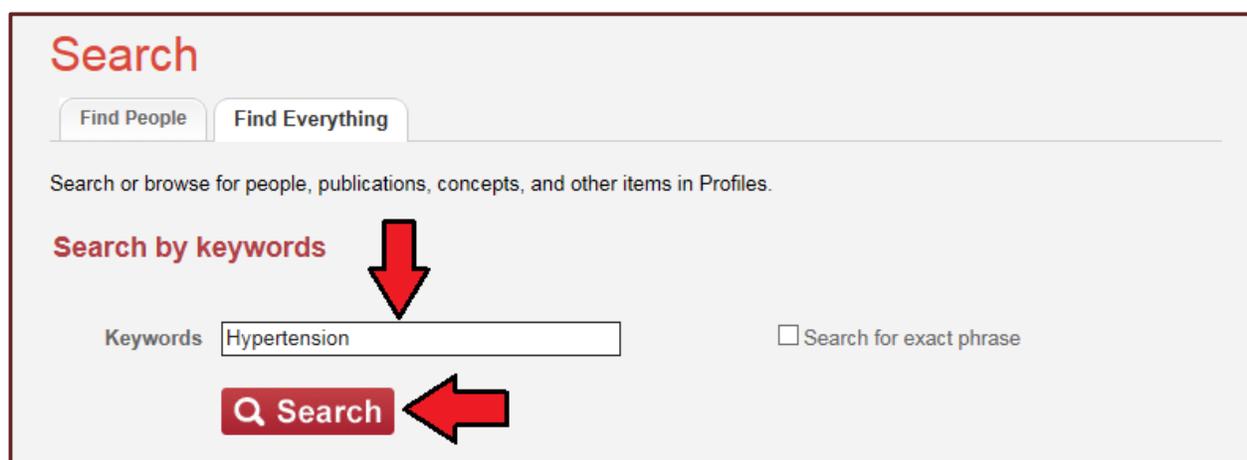

Click the **Why** column to see why a person matched the search.

Show Sort

The second main search option is located under the Find Everything tab. You can use the Find Everything search tab to search for people, publications, concepts and other items.

To perform a search, type your keyword(s) in the field and click on the red search button.

The next page you will see is a list of possible matches to your search. Search results under the Find Everything tab include links to both researcher profiles as well as other objects, such as publications.

Match	Type	Why?
Development of hypertension in adolescents with pre-hypertension.	Academic Article	Why?
Vascular calcium channels and high blood pressure: pathophysiology and therapeutic implications (Review)	Academic Article	Why?
Prevalence of hypertension and pre-hypertension among adolescents	Academic Article	Why?
Rusch, Nancy	Person	Why?

Clicking on a name will take you to that person's researcher profile. Clicking on any of the other links will open up a page with more information about the entry. Academic Article pages, for example, will list the full bibliographic information on the article, provide a link to the article in PubMed and provide information on related subjects.

The screenshot shows a PubMed article entry. At the top, the title "Development of hypertension in adolescents with pre-hypertension." is displayed in red. Below the title, the authors "Redwine KM, Acosta AA, Poffenbarger T, Portman RJ, Samuels J." and the journal information "Development of hypertension in adolescents with pre-hypertension. J Pediatr. 2012 Jan; 160(1):98-103." are listed. A link "View in: PubMed" is provided. A section titled "Subject Areas" is expanded, showing a list of related terms: Adolescent, Child, Disease Progression, Female, Humans, Hypertension, Male, Prehypertension, Risk Assessment, and Young Adult.

Basic Researcher Profile Display:

Each researcher profile has three main parts: biographical information, research activities, and publications.

Biographical information includes a person's title, department and contact information. Each person's biographical information is populated through SAP. Once a faculty member or post-doc is listed in SAP, their researcher profile page will be automatically added during the next Profiles System update.

Email NLINDELICATO@UAMS.EDU

Research activities covers the researcher's grant history and can be found under the Research Funds section of a person's researcher profile. Profiles lists grants according to the researcher's role as either principal investigator (PI) or co-investigator. Each grant list is built to display grants that have been active within the last five years.

PI lists are populated from UAMS TRACKS (Total Research and Compliance Knowledge System). Co-investigator lists are populated from UAMS FacFacts (Faculty Facts).

Research Funds

Principal Investigator

Funding Agency: NIH/Nat. Cancer Institute - Title: Resources for development and validation of Radiomic analyses & Adaptive Therapy - Award Number: 7 U01 CA187013-03 - Start Date: 2014-09-01

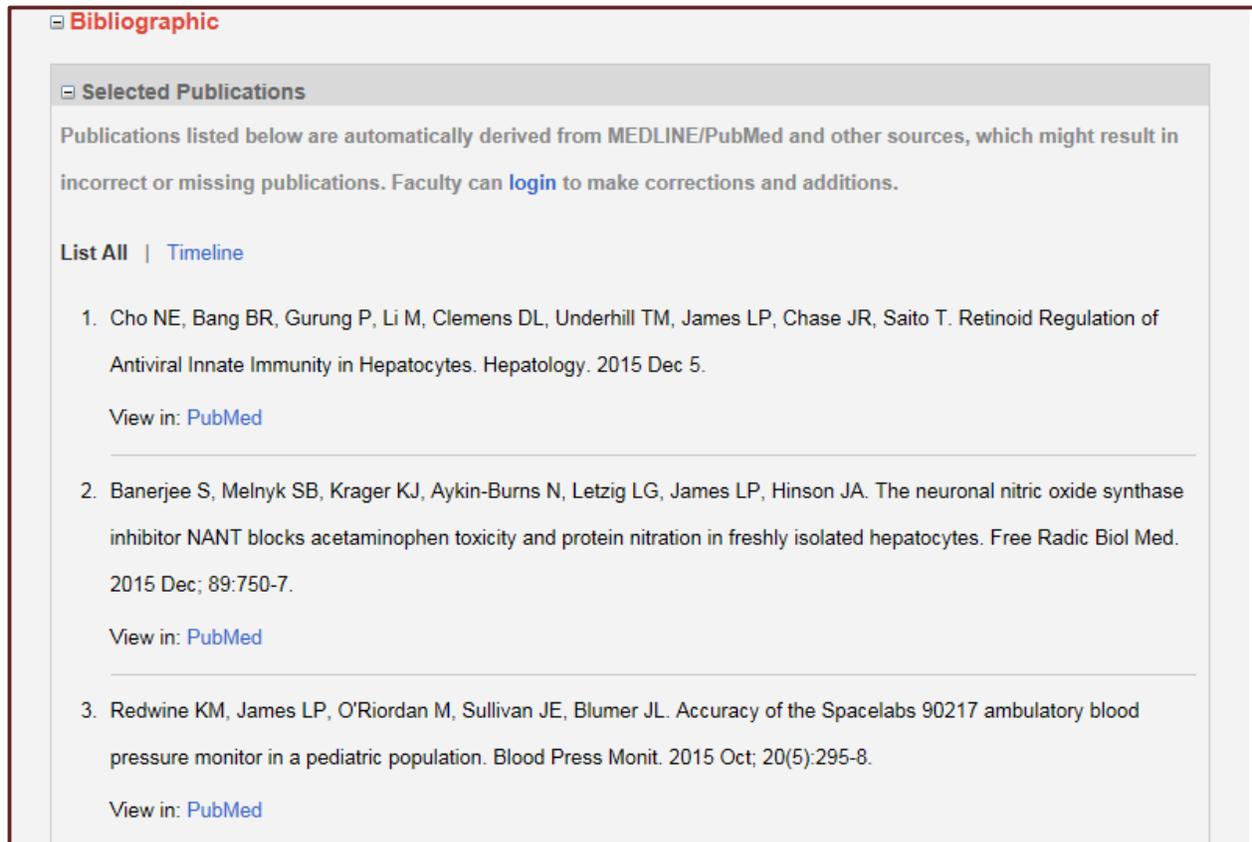

Funding Agency: UAMS ACHRI Flow Through - Title: Dipstick Assay for Detection of Acetaminophen Protein Adducts/STTR (ACHRI# 034814) - Award Number: ACHRI # 034814 - Total direct costs: \$179,787 - Start Date: 2011-07-20

Co-Investigator

Arkansas Biosciences Institute and ACHRI - Applied research in pediatric hypertension - Start Date: 2007-07-01 - End Date: 2012-06-30

Publications lists cover all years of activity. Publications listed are limited to articles made available through PubMed. However, there are ways for researchers to add other publications, which will be covered in detail on page 48.

For convenience, each PubMed article listed includes an external link to the publication.

Bibliographic

Selected Publications

Publications listed below are automatically derived from MEDLINE/PubMed and other sources, which might result in incorrect or missing publications. Faculty can [login](#) to make corrections and additions.

[List All](#) | [Timeline](#)

1. Cho NE, Bang BR, Gurung P, Li M, Clemens DL, Underhill TM, James LP, Chase JR, Saito T. Retinoid Regulation of Antiviral Innate Immunity in Hepatocytes. *Hepatology*. 2015 Dec 5.
View in: [PubMed](#)
2. Banerjee S, Melnyk SB, Krager KJ, Aykin-Burns N, Letzig LG, James LP, Hinson JA. The neuronal nitric oxide synthase inhibitor NANT blocks acetaminophen toxicity and protein nitration in freshly isolated hepatocytes. *Free Radic Biol Med*. 2015 Dec; 89:750-7.
View in: [PubMed](#)
3. Redwine KM, James LP, O'Riordan M, Sullivan JE, Blumer JL. Accuracy of the Spacelabs 90217 ambulatory blood pressure monitor in a pediatric population. *Blood Press Monit*. 2015 Oct; 20(5):295-8.
View in: [PubMed](#)

Networking Tools:

Profiles has a number of networking tools that allow researchers to find out more about each other and make collaborative connections. **These tools can be accessed through the Networks column to the right side of every researcher profile page.**

Concepts Networking Tool:

Concepts are research topics and areas of expertise within the medical field (lung cancer, hypertension, depression) that are ontologically linked to researchers through their publications.

A brief list of concepts is displayed for each researcher in the Concepts section of the Networks links. **To view a full list of a researcher's concepts, click on the see all link at the bottom of the list.**

Concepts ?

Acetaminophen
Liver Regeneration
Hepatocytes
Analgesics, Non-Narcotic
Drug-Induced Liver Injury

▶ See all (430) concept(s)

Co-Authors ?

Roberts, Dean
Bhattacharyya.

There are several options for viewing a person's concepts. Each option is located under a different tab. **To access a particular view, click the corresponding tab.**

Cloud view visually displays the strength of each concept for the researcher in question. The larger the typeface of the concept and bolder the font of the displayed concept, the more relevant they are to the researcher in question.

In this concept 'cloud', the sizes of the concepts are based not only on the number of corresponding publications, but also how relevant the concepts are to the overall topics of the publications, how long ago the publications were written, whether the person was the first or senior author, and how many other people have written about the same topic. The largest concepts are those that are most unique to this person.

2-Pyridinylmethylsulfinylbenzimidazoles	Immunoglobulin Fragments
Accidents, Home	Immunohistochemistry
Acetaminophen	Immunosuppressive Agents
Acetylcysteine	Incidence
Acidosis	Indicators and Reagents
Acute Disease	Indocyanine Green
Acute Kidney Injury	Indoles
Administration, Oral	Infant
Adolescent	Infant, Newborn

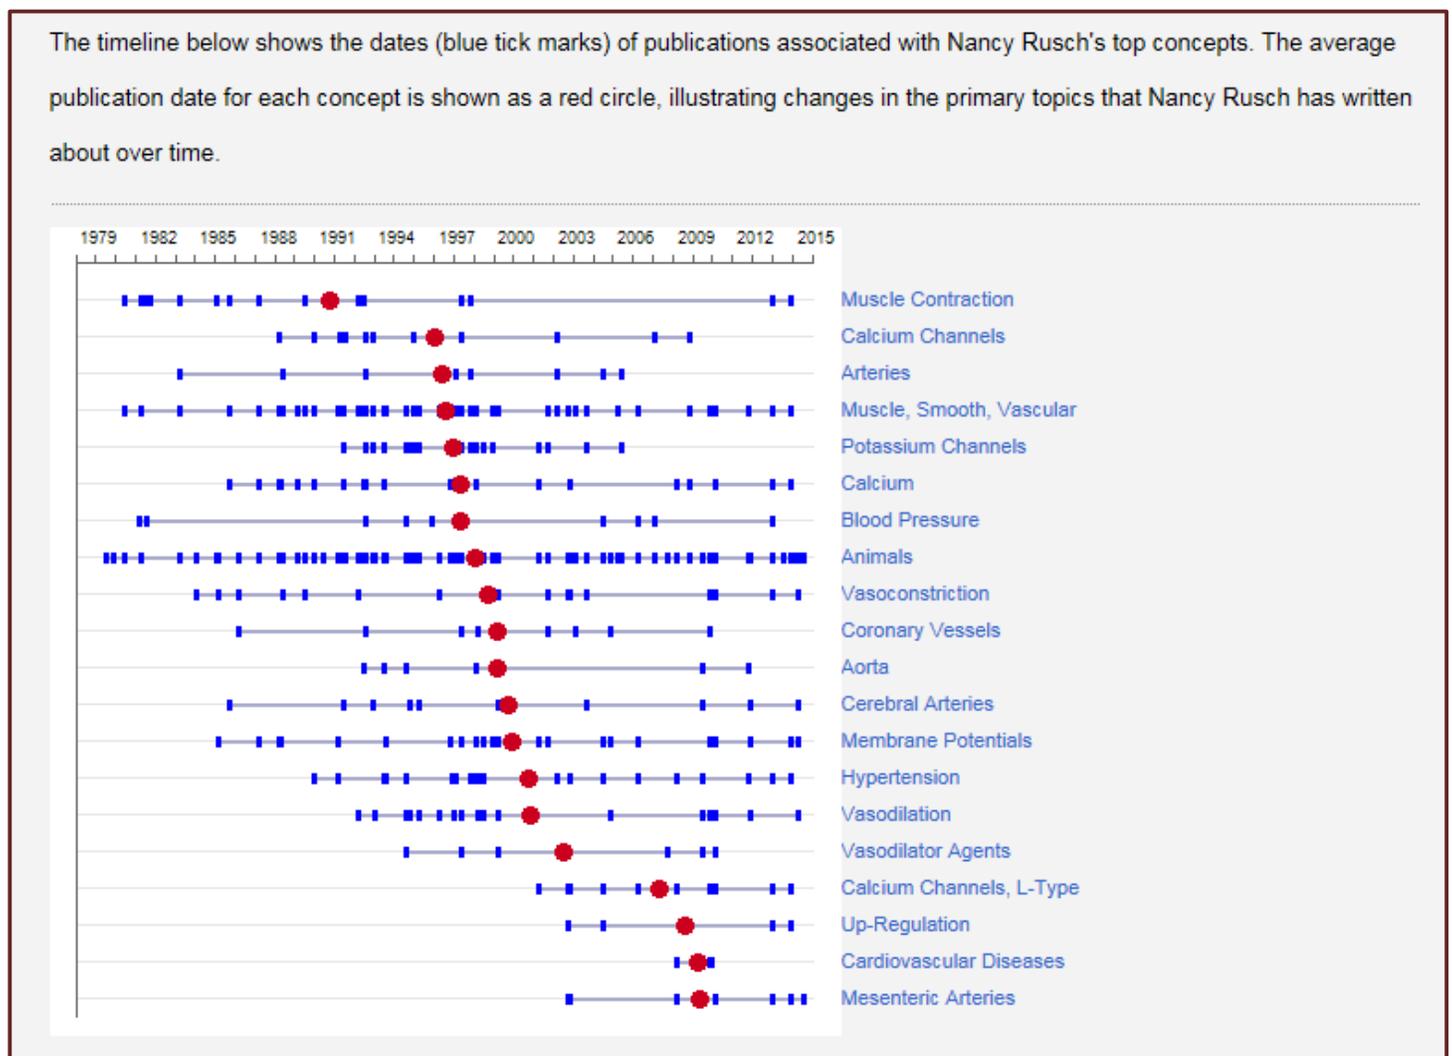

Categories view arranges concepts into categories.

Cloud Categories Timeline Details

Concepts listed here are grouped according to their 'semantic' categories. Within each category, up to ten concepts are shown, in decreasing order of relevance.

Activities & Behaviors	Disorders	Occupations
Self-Injurious Behavior	Drug-Induced Liver Injury	Pharmacology, Clinical
Fasting	Liver Failure, Acute	Emergency Medicine
Play and Playthings	Oxidative Stress	Pediatrics
Child Abuse	Drug Overdose	Forecasting
Drug Evaluation	Poisoning	Statistics as Topic
Irritable Mood	Liver Diseases	Forensic Toxicology
Statistics as Topic	Burns, Chemical	Medicine

Timeline view displays both the dates of publications associated with each researcher's concepts (blue tick marks) as well the average publication date for each concept (red circles).

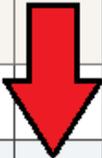

Details view populates a concepts table that lists each concept, the number of related publications for the researcher, the year of the most recent publication, and number of publications on the topic that other researchers (within UAMS) have written.

Concepts are listed by decreasing relevance which is based on many factors, including how many publications the person wrote about that topic, how long ago those publications were written, and how many publications other people have written on that same topic.

Name	Number of publications	Most recent publication	Publications by all authors	Concept score	Why?
Muscle, Smooth, Vascular	47	2013	159	7.050	Why?
Hypertension	21	2013	314	4.290	Why?
Potassium Channels	21	2005	50	3.370	Why?
Calcium Channels, L-Type	11	2013	81	3.110	Why?
Calcium	22	2013	478	2.280	Why?
Vasodilation	18	2014	76	2.260	Why?

From the details tab, you can also access a list of publications written by the researcher for each concept. To access this list, click on the **Why?** link for the desired concept.

Name	Number of publications	Most recent publication	Publications by all authors	Concept score	Why?
Muscle, Smooth, Vascular	47	2013	159	7.050	
Hypertension	21	2013	314	4.290	Why?
Potassium Channels	21	2005	50	3.370	Why?

Clicking on the **Why?** link will take you to a Connection page for the researcher and the concept. The Connection page lists the relevant publications and provides a link to each in PubMed.

[Hypertension](#)

1. Kharade SV, Sonkusare SK, Srivastava AK, Thakali KM, Fletcher TW, Rhee SW, Rusch NJ. The β_3 subunit contributes to vascular calcium channel upregulation and hypertension in angiotensin II-infused C57BL/6 mice. *Hypertension*. 2013 Jan; 61(1):137-42.

View in: [PubMed](#)

Score: 0.633

2. Pathan AR, Rusch NJ. Two-pore domain K⁺ channels: evidence for TWIK-2 in blood pressure regulation. *Hypertension*. 2011 Oct; 58(4):539-41.

View in: [PubMed](#)

Score: 0.583

Each concept is also tied to a concept profile. Clicking on any concept will take you to the concept's profile page. Here we have the Concept page for Acetaminophen.

Acetaminophen

"Acetaminophen" is a descriptor in the National Library of Medicine's controlled vocabulary thesaurus, [MeSH \(Medical Subject Headings\)](#). Descriptors are arranged in a hierarchical structure, which enables searching at various levels of specificity.

MeSH Information

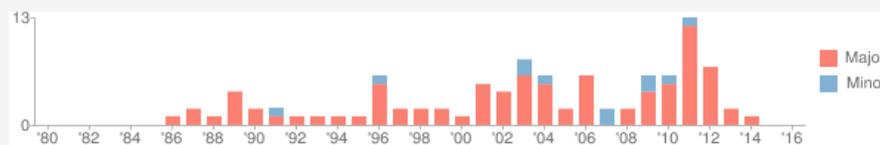

[Definition](#) | [Details](#) | [More General Concepts](#) | [Related Concepts](#) | [More Specific Concepts](#)

Analgesic antipyretic derivative of acetanilide. It has weak anti-inflammatory properties and is used as a common analgesic, but may cause liver, blood cell, and kidney damage.

Publications

[Timeline](#) | [Most Recent](#)

This graph shows the total number of publications written about "Acetaminophen" by people in UAMS Catalyst Profiles by year, and whether "Acetaminophen" was a major or minor topic of these publication.

The first half of a concept profile page provides information from the National Library of Medicine. Accessible information includes: definition, details (descriptor ID and MeSH numbers), and links to related concepts. **To access this information, click on the appropriate tab link located below the MeSH heading.**

Acetaminophen

"Acetaminophen" is a descriptor in the National Library of Medicine's controlled vocabulary thesaurus, [MeSH \(Medical Subject Headings\)](#). Descriptors are arranged in a hierarchical structure, which enables searching at various levels of specificity.

MeSH Information

[Definition](#) | [Details](#) | [More General Concepts](#) | [Related Concepts](#) | [More Specific Concepts](#)

Analgesic antipyretic derivative of acetanilide. It has weak anti-inflammatory properties and is used as a common analgesic, but may cause liver, blood cell, and kidney damage.

Below the MeSH section is information on publications for each concept. Unlike publication information listed under researcher profiles, publication information listed here reflects all UAMS researchers.

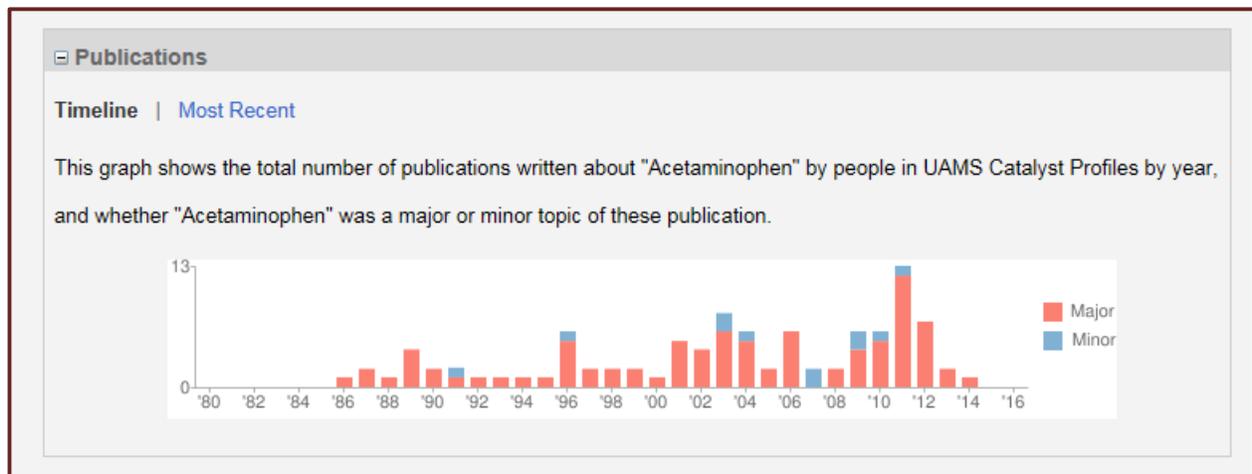

There are two options for viewing publication information: Timeline view and Most Recent view. Each option is located under a different tab. **To access a particular view, click the corresponding tab.**

Publications

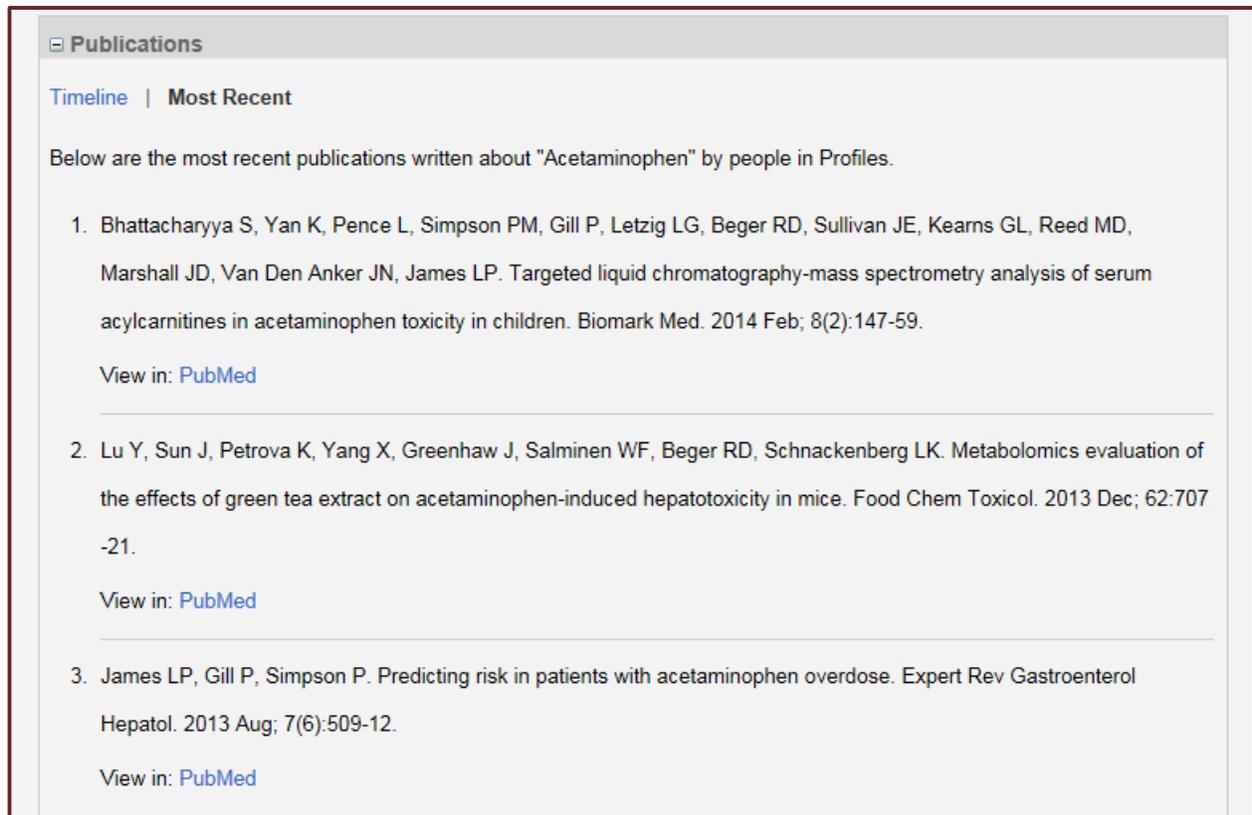

[Timeline](#) | [Most Recent](#)

This graph shows the total number of publications written about "Acetaminophen" by people in UAMS Catalyst Profiles by year, and whether "Acetaminophen" was a major or minor topic of these publication.

Timeline view displays a graph showing the number of publications for the chosen concept divided out by each year.

Most Recent view provides a list of the most recent articles written about the chosen concept, as well as a link to each article in PubMed.

The screenshot shows a 'Publications' section with a 'Most Recent' tab selected. Below the tab, there is a heading 'Below are the most recent publications written about "Acetaminophen" by people in Profiles.' followed by a list of three articles. Each article entry includes the authors' names, the journal title, and the publication date and volume/issue information. A 'View in: PubMed' link is provided for each article.

Publications

[Timeline](#) | **Most Recent**

Below are the most recent publications written about "Acetaminophen" by people in Profiles.

1. Bhattacharyya S, Yan K, Pence L, Simpson PM, Gill P, Letzig LG, Beger RD, Sullivan JE, Kearns GL, Reed MD, Marshall JD, Van Den Anker JN, James LP. Targeted liquid chromatography-mass spectrometry analysis of serum acylcarnitines in acetaminophen toxicity in children. *Biomark Med.* 2014 Feb; 8(2):147-59.
View in: [PubMed](#)
2. Lu Y, Sun J, Petrova K, Yang X, Greenhaw J, Salminen WF, Beger RD, Schnackenberg LK. Metabolomics evaluation of the effects of green tea extract on acetaminophen-induced hepatotoxicity in mice. *Food Chem Toxicol.* 2013 Dec; 62:707-21.
View in: [PubMed](#)
3. James LP, Gill P, Simpson P. Predicting risk in patients with acetaminophen overdose. *Expert Rev Gastroenterol Hepatol.* 2013 Aug; 7(6):509-12.

Co-Authors Networking Tool:

A brief list of co-authors (inside the UAMS system) is displayed for each researcher in the Co-Authors section of the Networks links. You can access any of the listed co-authors' researcher profile pages by clicking on the person's name. **To view a full list of a researcher's co-authors, click on the see all link at the bottom of the list.**

The screenshot shows a 'Co-Authors' section with a list of names: Roberts, Dean; Bhattacharyya, Sudeepa; Beger, Richard; Simpson, Pippa; and Hinson, Jack. Below the list is a link 'See all (66) people' with a blue square icon. Below this is a 'Similar People' section with a list of names: Badger, Thomas; and Beger, Richard. A red arrow points to the 'See all (66) people' link.

Co-Authors ?

[Roberts, Dean](#)
[Bhattacharyya, Sudeepa](#)
[Beger, Richard](#)
[Simpson, Pippa](#)
[Hinson, Jack](#)

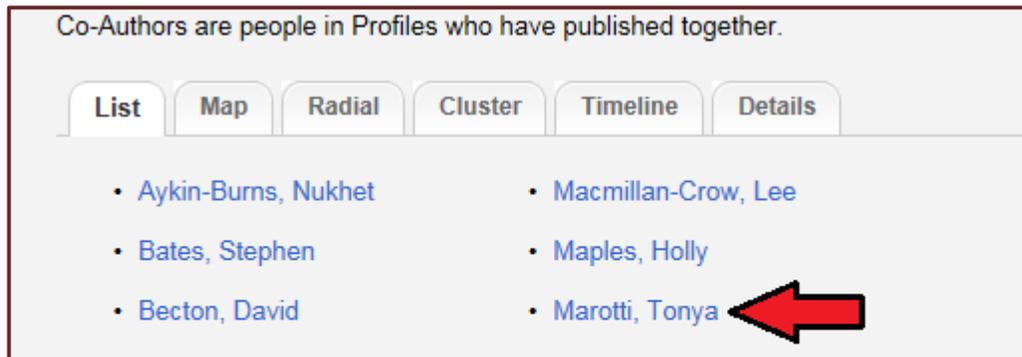

[See all \(66\) people](#)

Similar People ?

[Badger, Thomas](#)
[Beger, Richard](#)

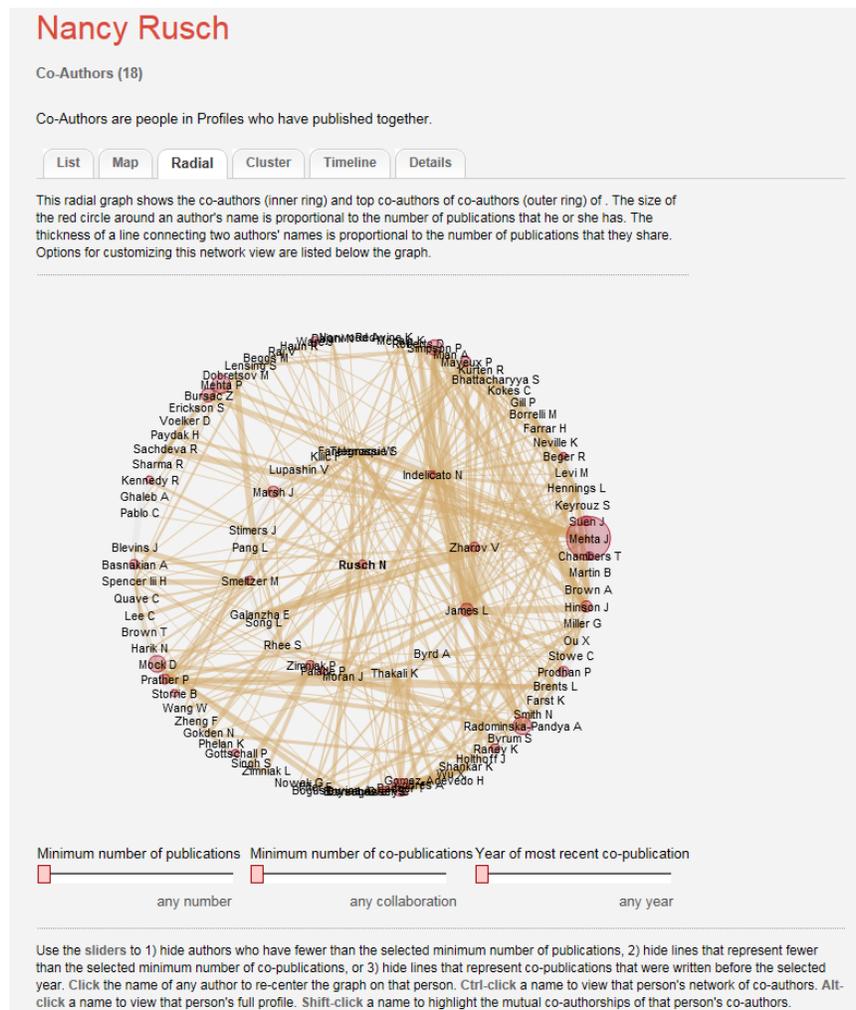

There are several options for viewing a person's co-authors. Each option is located under a different tab. **To access a particular view, click the corresponding tab.**

List view provides an alphabetical list of co-authors. You can access each co-author's researcher profile page by clicking on their name.

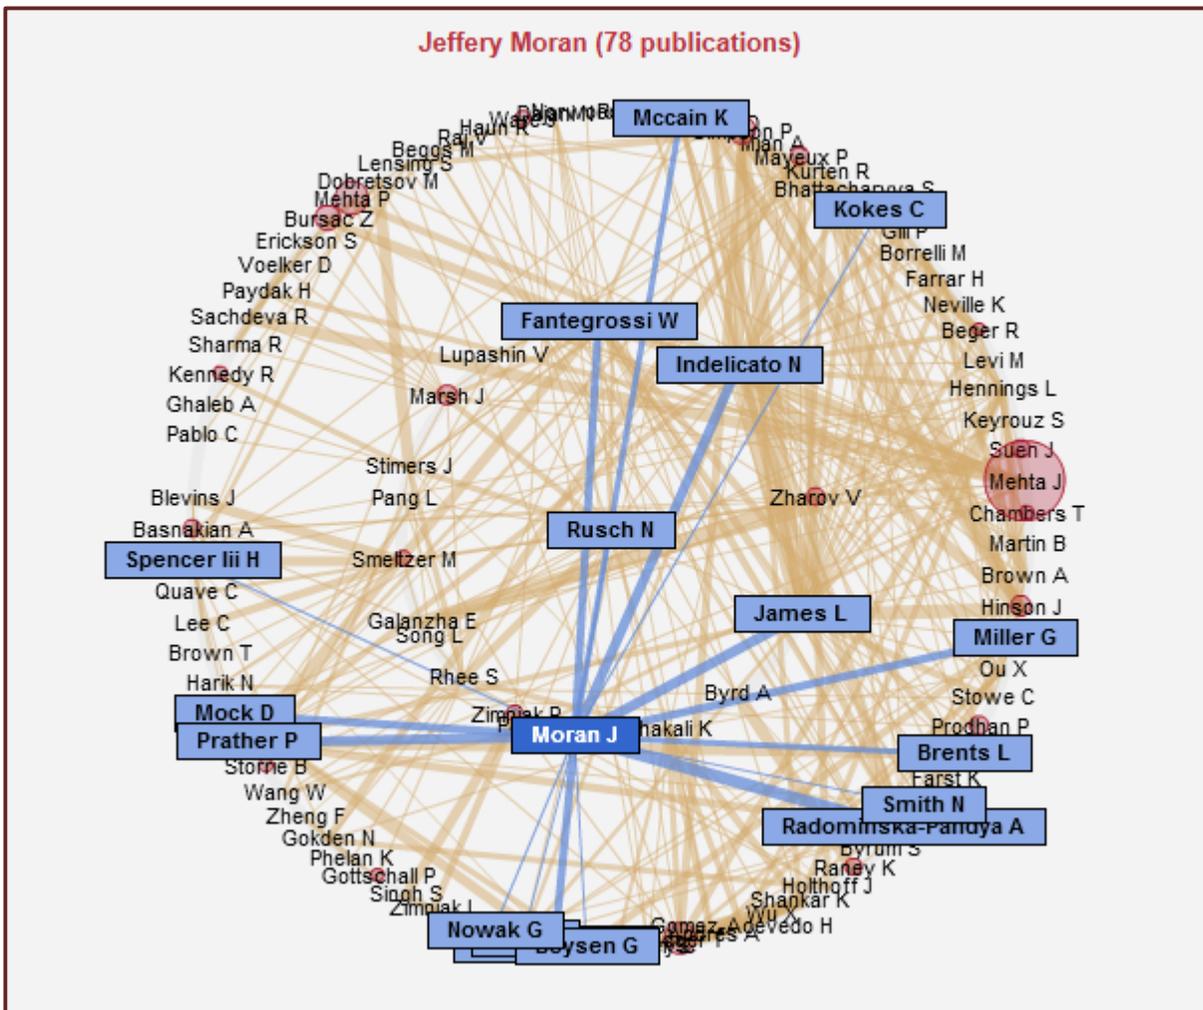

Map view provides a Google map view of where co-authors are located.

Radial and Cluster views are similar and provide multi-layer graphical representations of the links between both the original researcher and his/her co-authors and their own co-authors.

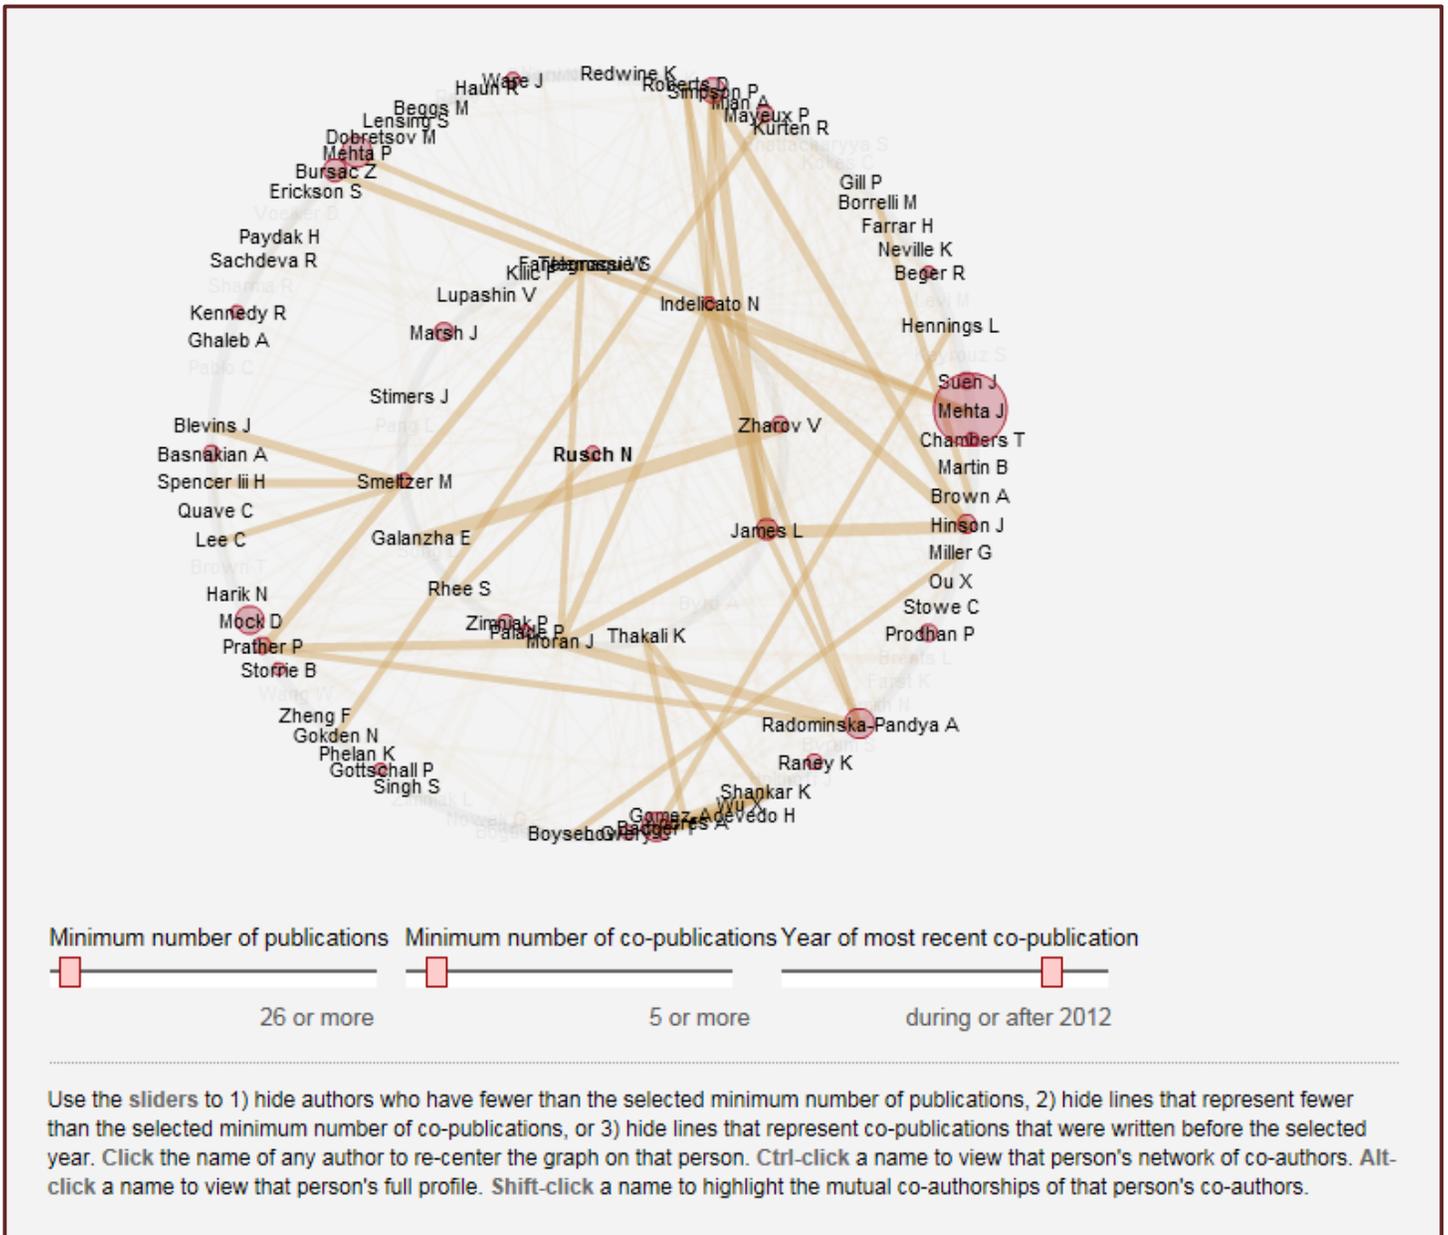

At the center of the radial is the researcher whose researcher profile you are viewing. The next immediate ring of names is his/her co-authors. The outer ring of names is the second ring's co-authors (co-authors of co-authors). The size of the red circles in the radial view is representative of how many publications he/she has. The thickness of the line connecting two people is proportional to the number of publications they share.

If you hover over a name in the graph, the relationships specific to that person will be highlighted. (Below, Moran, J. is highlighted)

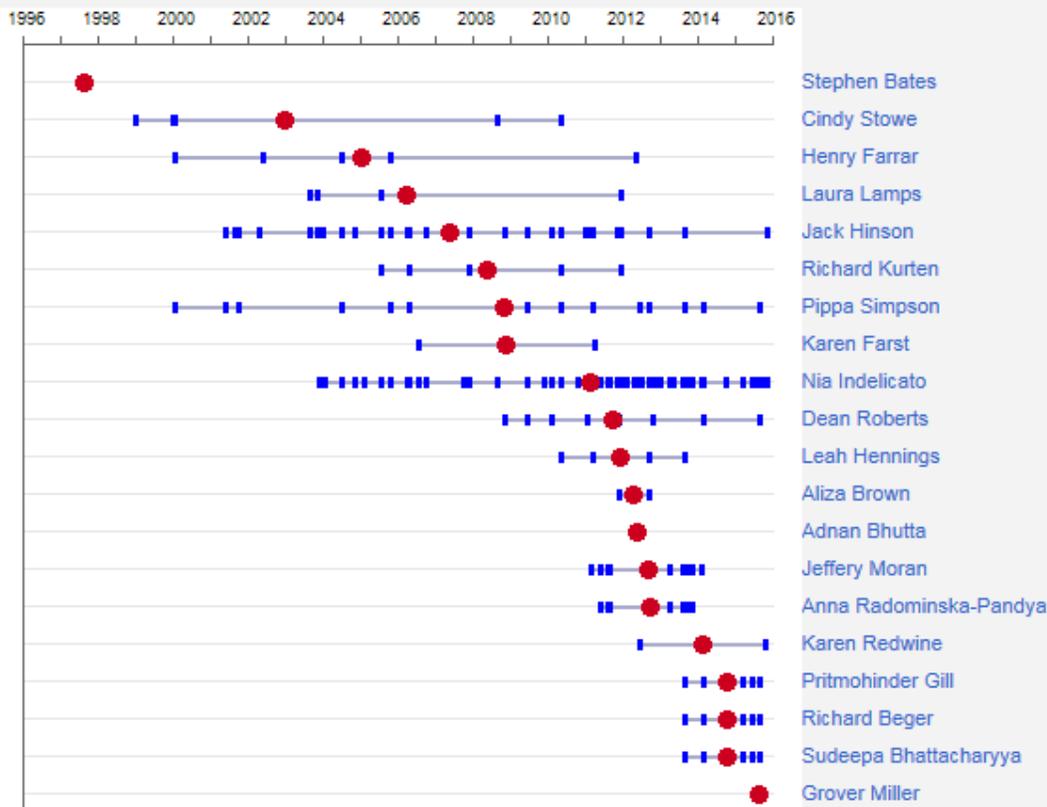

The slide counters on the bottom of the graph enable you to refine the view to require a minimum number of publications and to select the year of the researcher's most recent co-publications.

Timeline view displays both the dates of shared publications associated with each listed co-author (blue tick marks) as well the average publication date for each co-author (red circles).

The timeline below shows the dates (blue tick marks) of publications Laura James co-authored with other people in Profiles. The average publication date for each co-author is shown as a red circle, illustrating changes in the people that Laura James has worked with over time.

Details view populates a table that lists each co-author, the year of the most recent co-publication for each co-author, and the total number of co-publications for each co-author.

Co-Authors are people in Profiles who have published together.

Co-Authors are listed by decreasing relevance which is based on the number of co-publications and the years which they were written.

Name	Most recent co-publication	Number of co-publications	Co-author score	Why?
Jack Hinson	2015	29	7.490	Why?
Pippa Simpson	2015	16	3.030	Why?
Dean Roberts	2015	8	2.990	Why?
Richard Beger	2015	5	2.580	Why?

From the details tab, you can also access a list of publications between each researcher and his/her co-authors. To access this list, click on the why? link for the desired co-author.

Connection

Co-Authors

This is a "connection" page, showing publications co-authored by Laura James and Jack Hinson.

1. Hinson JA, Roberts DW, James LP. Mechanisms of acetaminophen-induced liver necrosis. *Handb Exp Pharmacol.* 2010; (196):369-405.

View in: [PubMed](#)

Score: 0.655

2. James LP, Donahower B, Burke AS, McCullough S, Hinson JA. Induction of the nuclear factor HIF-1alpha in acetaminophen toxicity: evidence for oxidative stress. *Biochem Biophys Res Commun.* 2006 Apr 28; 343(1):171-6.

View in: [PubMed](#)

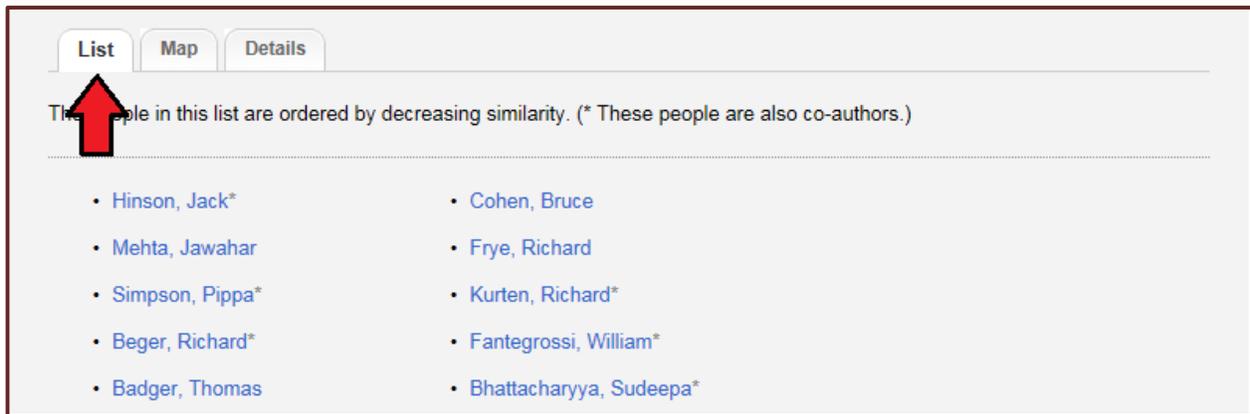

Score: 0.502

Similar People Networking Tool:

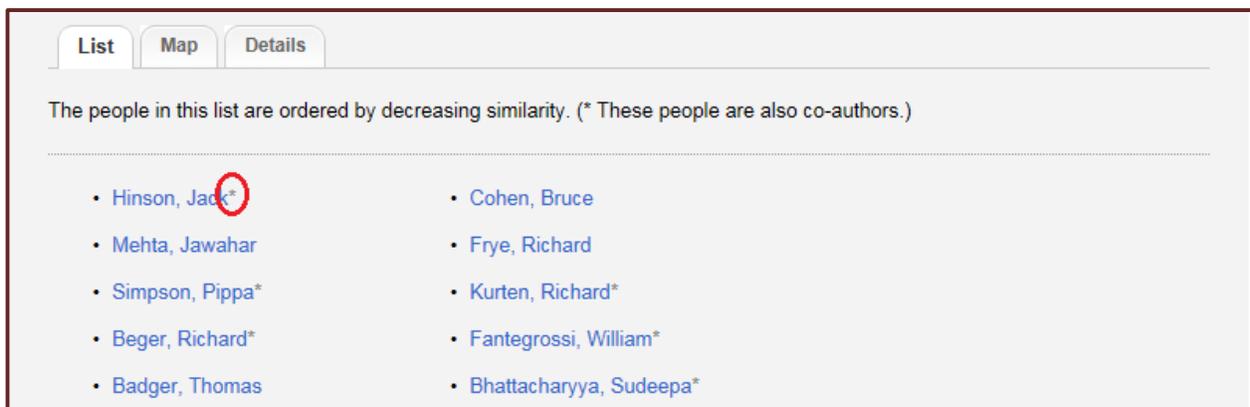

A brief list of similar people (inside the UAMS system) is displayed for each researcher in the Similar People section of the Networks links. You can access any of the listed similar peoples' researcher profile page by clicking on the person's name. **To view a full list of a researcher's similar people, click on the see all link at the bottom of the list.**

There are several options for viewing a researcher's similar people. Each option is located under a different tab. **To access a particular view, click the corresponding tab.**

List view provides a list of UAMS faculty and post-docs that have similar research interests and activities as the researcher in question. Each name is linked to a researcher profile that can be accessed by clicking on the desired person's name. **Names with asterisks beside them are co-authors of the researcher in question.**

Map view provides a Google map view of where similar people are located.

Details view populates a table that lists each similar person, indicates whether they are a co-author, and lists their similarity score.

Name	Also Co-Authors	Similarity Score	Why?
Jack Hinson	Yes	280.3	Why?
Jawahar Mehta		92.75	Why?
Pippa Simpson	Yes	80.78	Why?
Richard Beger	Yes	75.97	Why?

Similarity scores are calculated based on the number of concepts each person has in common as well as and each individual's prevalence within a concept. **You can access information on why two people are listed as similar by clicking on the why link on the desired person.**

Similar people share similar sets of concepts, but are not necessarily co-authors.

Name	Also Co-Authors	Similarity Score	Why?
Jack Hinson	Yes	280.3	Why?
Jawahar Mehta		92.75	Why?

The resulting connection page will display concepts that the two researchers share, as well as each person's connection score to that concept.

Search About / FAQ Edit My Profile Login to Profiles DIRECT2Experts Preferred browser Internet Explorer

DIRECT2Experts

Distributed Interoperable Research Experts Collaboration Tool (DIRECT)

DIRECT is pilot project to demonstrate federated search across multiple institutions.

Keywords x Search

In this example, DIRECT2Expert then displays a list of participating institutions (drawn from Profiles, Vivo, and SciVal) and the number of lung cancer researchers at each institution.

Below are the number of matching people at participating institutions. Click an institution name to view the list of people. As you move your mouse over the different institution names, you will see important notes about that institution's data on the right and a preview/summary of the matching people at the bottom of this page.

Institution	Matches
Albert Einstein College of Medicine	169
Arizona State University	0
Boston University	184
Cornell University	25
Harvard University	1786
Indiana CTSI	0
Indiana University School of Medicine	178
John Hopkins University	798

To access more information, click on any of the institutions listed. This will open up a new browser tab that has linked to that institution's page. The link for Cornell is displayed below.

The screenshot shows the Cornell University VIVO search results page for 'Lung Cancer'. The page features a red header with the Cornell University logo and 'VIVO Research & Expertise Across Cornell'. A search bar contains 'Lung Cancer' and a 'Search' button. Below the header is a navigation menu with links for Home, People, Organizations, Research, and Events. The main content area displays search results for 'Lung Cancer' limited to type 'people'. The results list several faculty members with their names, titles, and brief descriptions of their research. A sidebar on the right offers filters to limit results by affiliation, such as Cornell Academic Appointee (19), Cornell Academic Staff (1), Cornell Affiliated Person (19), Cornell Emeritus Professor (2), Cornell Faculty Member (17), Faculty Member (21), and Faculty Member Emeritus (2). A link 'Not the results you expected?' is also present.

Each institution's results page is interactive. You can click on any listed name to access more information about them.

Editing Your Researcher Profiles:

To edit your researcher profile, click on the Edit My Profile link in the main menu.

The screenshot shows the main menu of the University of Arkansas for Medical Sciences (UAMS) website. The UAMS logo is prominently displayed at the top left. Below the logo is a navigation bar with several links: Search, About / FAQ, Edit My Profile, Login to Profiles, and DIRECT2Experts. A red arrow points directly to the 'Edit My Profile' link. To the right of the navigation bar, there is a note: 'Preferred browser Internet Explorer'.

If you are not already logged in, you will be directed to the Profiles login page. You must be logged in to edit your researcher profile. To login, enter your UAMS username and password and click on the login button.

Once you are logged in, you will be automatically directed to the edit page for your researcher profile.

Indelicato, Nia

Edit Menu

Below are the types of content that can be included on this profile. Locked items  can be viewed but not edited. To edit information on locked items, please email [TRI Services](#).

Information in the Address section of your profile, including your titles, affiliations, telephone, fax, and email are managed by your Human Resources office; however, you may upload a custom photo to your profile using this website.

Category: Address	Items	Privacy
mailing address	1 	Public
email address	1 	No Search
photo	1	Public

Each edit page contains a number of categories that correspond to information displayed on your researcher profile. You will notice that there are categories that are not displayed on your researcher profile. These categories require each user to input the information, and are considered optional. Users are welcome to add as much information to their researcher profiles as they would like using the categories and options available on the edit page. Users are not required to add any information if they do not wish to. Instructions on adding information and editing these categories are included later in this manual.

You will notice that some categories and items have little locked icons next to them. These are items that can only be edited by Profiles Site Administrators.

Category: Address	Items	Privacy
mailing address	1 	Public
email address	1 	No Search
photo	1	Public

All items without the locked icon can be accessed by clicking on the name of the item. This will take you to the edit page for that item where you can then make the necessary changes.

Editing your photo:

Profiles populates photos from SAP. Not all researchers have photos in SAP. If your researcher profile is missing a photo, you can easily add one. Or, if you have an updated photo that is more current than the one in SAP, you can change it.

To edit your photo, first click on the photo entry of your main editing page.

Category: Address	Items	Privacy
mailing address	1	Public
email address	1	No Search
photo	1	Public

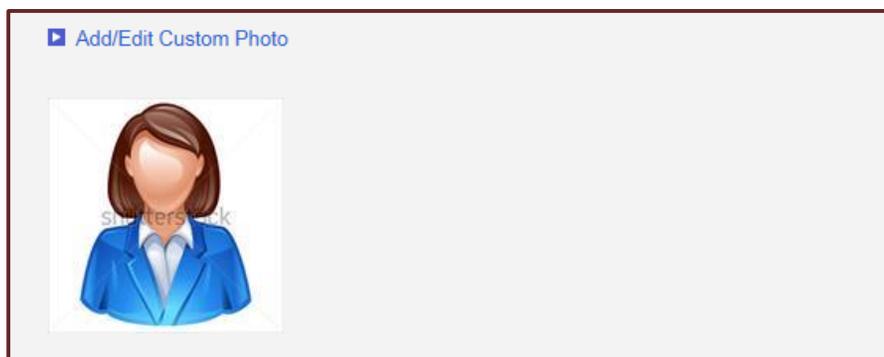

This will take you to the photo editing page. Click on the **Add/Edit Custom Photo** link.

This will populate an upload box. Click on the browse button to access your computer's files. Chose the file you would like to have as your profile picture.

Once you chose the file, Profiles will upload the image. A successful upload will refresh to the new photo.

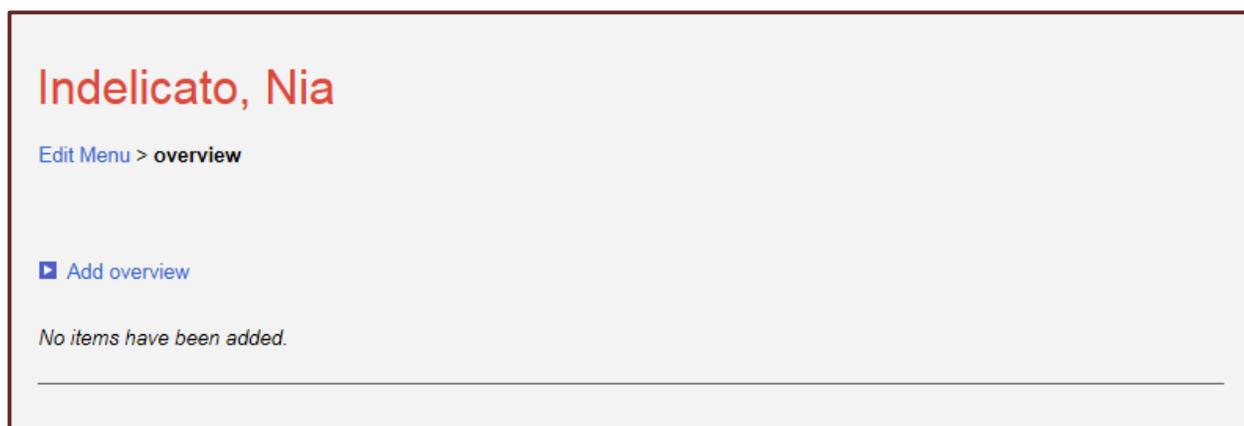

Editing Overview

The Overview section is a great place for you to add a personal statement about yourself and your research. UAMS faculty with designated roles relevant to research may wish to use this space to list any relevant titles (e.g., directors of core laboratories, etc.). Clinical faculty may want to use this space to describe specialty populations cared for in their clinic.

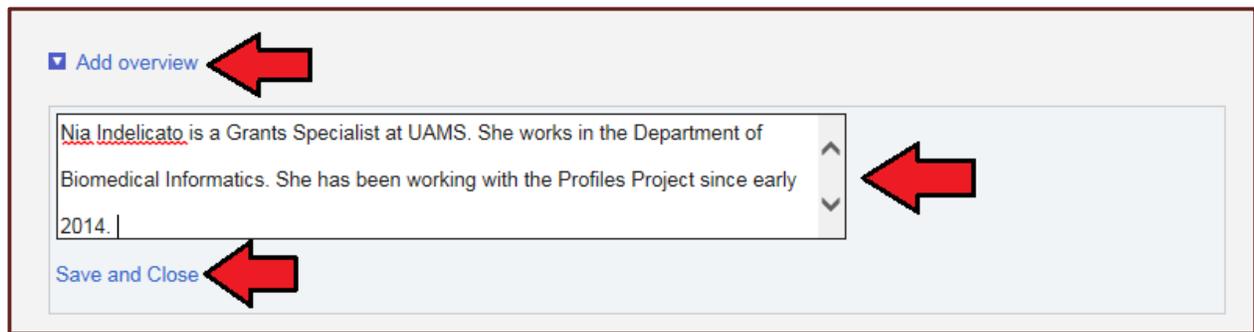

First click on overview.

Category: Overview	Items	Privacy
overview 	0	Public

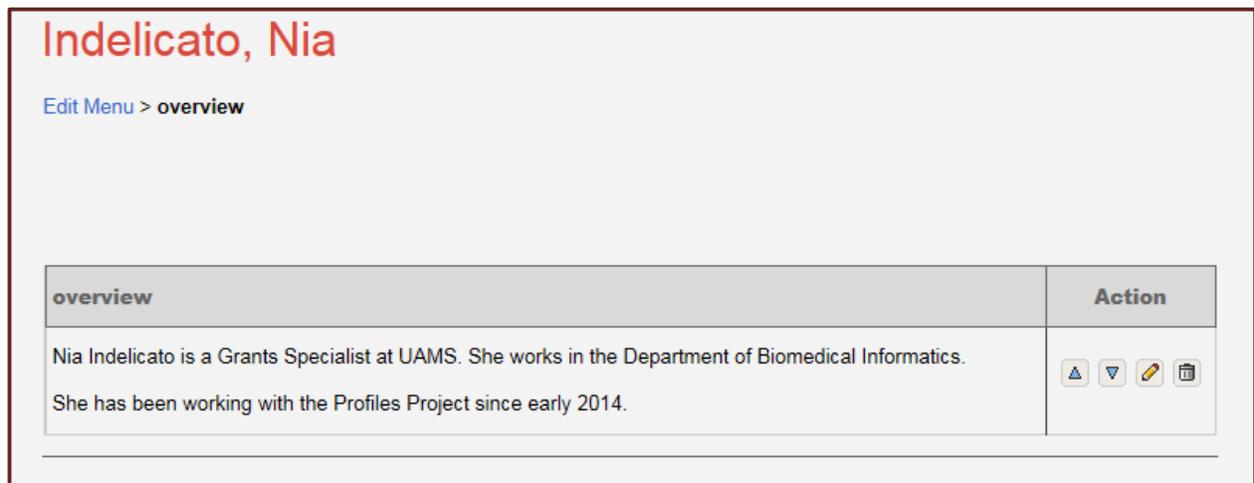

This will take you to that item's editing page.

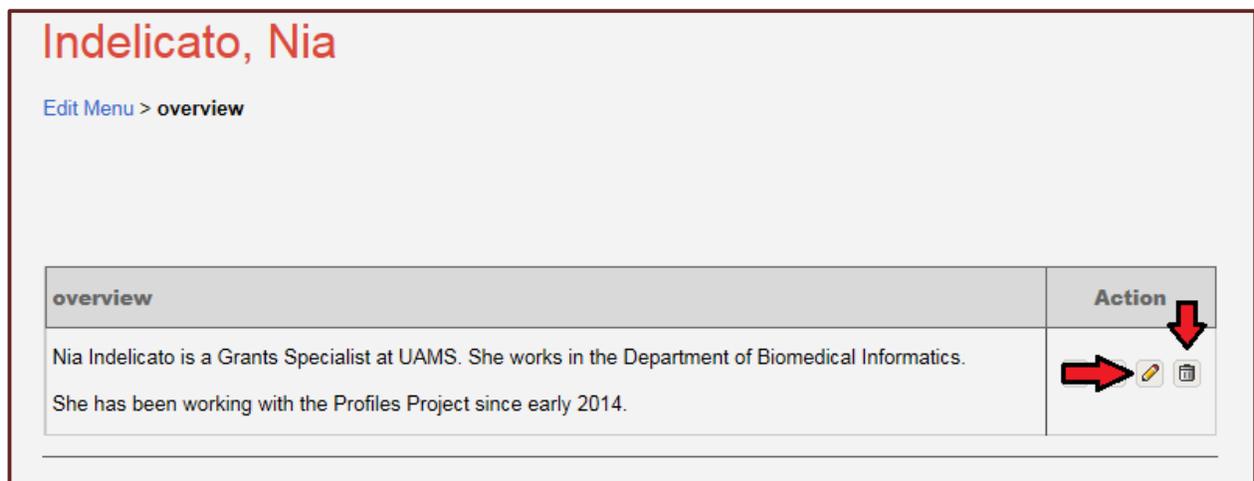

Click on the Add overview link. This will populate a field for you to add your information into. You can type your overview into the text box, or you can paste in a pre-prepared statement from another source. If you choose to copy/paste, please paste in plain text. We recommend pasting your material in your computer's notepad and then copying and pasting it into the overview box. When you are done, choose save and close.

Your new item will now appear on the overview edit page.

Once your overview has been added, you have the ability to edit the entry (yellow pencil icon) or to delete it entirely (trashcan icon).

You will now have an Overview section on your researcher profile that was not previously there.

Editing Teaching (teaching overview, teaching activities, and advisees)

The process for editing the Teaching Overview section is different from the process for editing teaching activities and advisees (which share the same editing process).

Editing Teaching Overview:

First click on teaching overview.

Category: Teaching	Items	Privacy
teaching overview	0	Public
teaching activities	0	Public
advisees	0	Public

This will take you to the teaching overview editing page.

Indelicato, Nia

[Edit Menu](#) > teaching overview

[Add teaching overview](#)

No items have been added.

Click on the Add teaching overview link. This will populate a field for you to add your information into. You can type your overview into the text box, or you can paste in a pre-prepared statement from another source. If you choose to copy/paste, please paste in plain text. We recommend pasting your material in your computer's notepad and then copying and pasting it into the teaching overview box. When you are done, choose Save and Close.

[Add teaching overview](#)

Nia Indelicato has been a teacher for ten years. Her focus is adult education and literacy.

[Save and Close](#)

Your new item will now appear on the overview edit page.

Nia Indelicato is very engaged in both community and professional outreach.

Editing Publications:

Profiles automatically searches PubMed for publications written by each user. The algorithm used to populate articles has a specific threshold it uses to match articles' authors to UAMS faculty and post-doctoral researchers. The threshold is set to maximize correct pulls and minimize errors. However, there may be both missing articles and incorrectly attributed articles in your publications list. It is recommended that each user verify his/her publication list when they logon to Profiles for the first time. Changes you make to your researcher profile will remain and not be overridden with system updates.

Category: Bibliographic	Items	Privacy
selected publications	101	Public
additional bibliographic sources	0	Public

To access your list of publications, click on selected publications.

Category: Bibliographic	Items	Privacy
selected publications 	101	Public
additional bibliographic sources	0	Public

This will take you to your publications editing page.

On this page you will see a list of your PubMed generated publications (plus any you have added yourself) as well as several options for manually adding publications.

Indelicato, Nia

[Edit Menu](#) > **selected publications**

▣ [Add PubMed](#) (Search PubMed and add multiple articles.)

▣ [Add by ID](#) (Add one or more articles using codes, e.g., PubMed ID.)

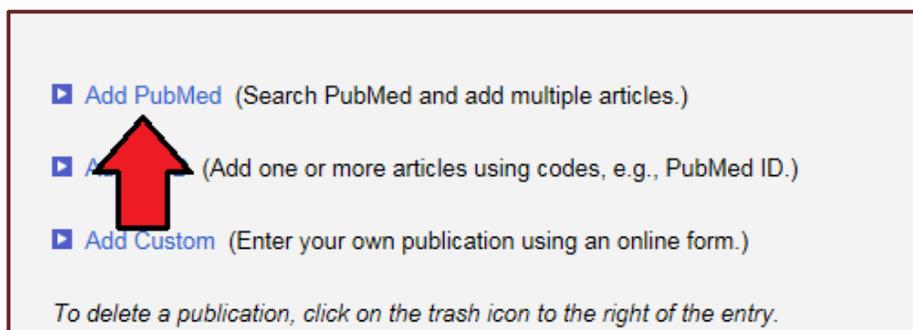

▣ [Add Custom](#) (Enter your own publication using an online form.)

To delete a publication, click on the trash icon to the right of the entry.

selected publications	
1. Williams NL, Rotondo RL, Bradley JA, Pincus DW, Fort JA, Wynn T, Morris CG, Mendenhall NP, Indelicato DJ. Late Effects After Radiotherapy for Childhood Low-grade Glioma. Am J Clin Oncol. 2016 Jan 22.	
2. Di Gaudio F, Indelicato S, Monastero R, Altieri GI, Fayer F, Palesano O, Fontana M, Cefalù AB, Greco M, Bongiorno D, Indelicato S, Aronica A, Noto D, Averna MR. FragClust and TestClust, two informatics tools for chemical structure hierarchical clustering analysis applied to lipidomics. The example of Alzheimer's disease. Anal Bioanal Chem. 2016 Jan 11.	
3. Indelicato E, Fanciulli A, Poewe W, Antonini A, Pontieri FE, Wenning GK. Cerebral autoregulation and white matter lesions in Parkinson's disease and multiple system atrophy. Parkinsonism Relat Disord. 2015 Dec; 21(12):1393-7.	

You can add PubMed publications by using either the **Add PubMed** link, which lets you search PubMed using various attributes, or the **Add by ID** link, which allows you to add by PubMed ID.

To add through publications through a PubMed search, click on the **Add PubMed** link.

This will populate fields that will allow you to search PubMed for publications. You can search by author, affiliation, or keyword; or you can conduct your own arbitrary query. Just type your information in the appropriate boxes and click on the search link.

Add PubMed (Search PubMed and add multiple articles.)

Search PubMed

Enter author, affiliation or keyword in the field below. 

Author(s)
(One per line)

Affiliation Optional

Keyword Optional

Or you can also search by an arbitrary PubMed query in the field below. 

Query

Exclude articles already added to my profile.

[Search](#) | [Reset](#) | [Close](#)

When your search results appear, simply click the boxes next to articles you wish to add.

 Check the articles that are yours in the list below, and then click "save" at the bottom of the selection field.

PubMed Results (100)

Select: [All](#) | [None](#)

 Sporer KA, Barger JA, Brown JF, Gilbert GH, Koenig KL, Rudnick EM, Salvucci AA; Chest Pain of Suspected Cardiac Origin: Current Evidence-based Recommendations for Prehospital Care.; 2015 Dec;16(7):983-95

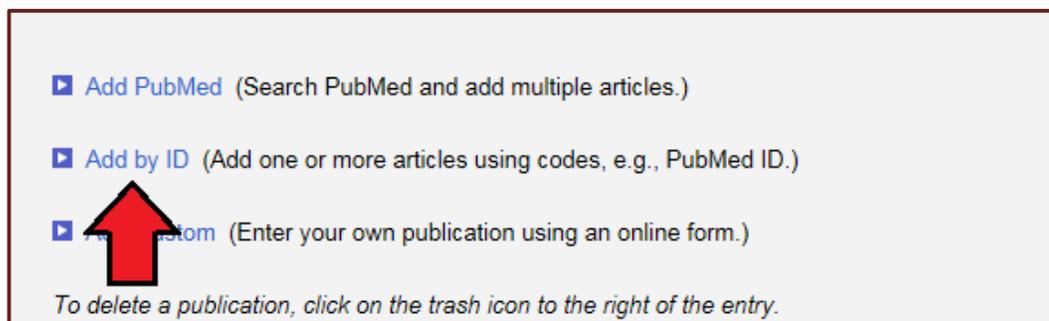

Dart AE, Box GM, Court W, Gale ME, Brown JP, Pinder SE, Eccles SA, Wells CM; PAK4 promotes kinase-independent stabilization of RhoU to modulate cell adhesion.; 2015 Nov 23;211(4):863-79

Then scroll to the bottom of the results list, and click on Save to add them to your researcher profile.

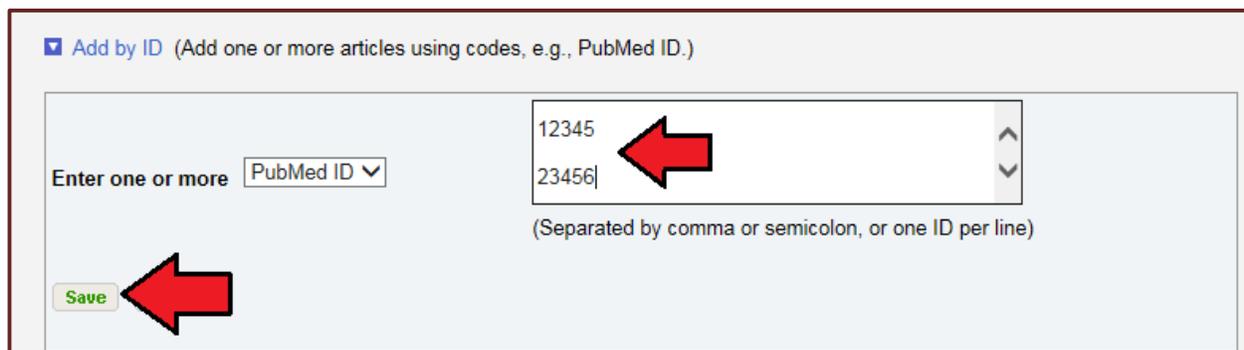

Manually added publications will automatically sort chronologically into your publications list.

To add by PubMed ID, click on the Add by ID link.

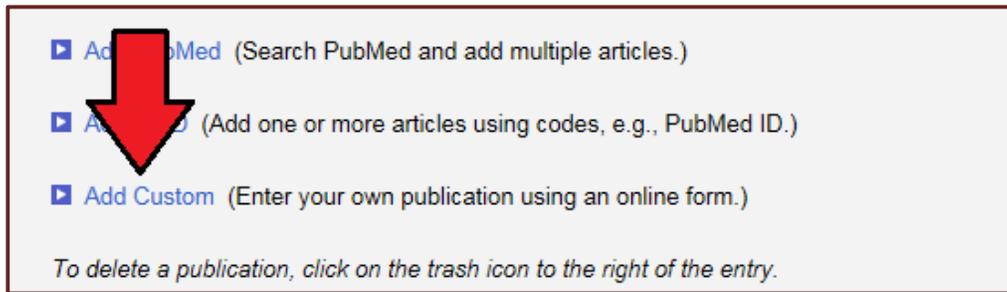

This will populate a field that will allow you to PubMed publications by their IDs. You can add multiple publications by either separating ID by comma or by entering one per line. Once you have entered the ID(s), click on the save button to add the publications to your researcher profile.

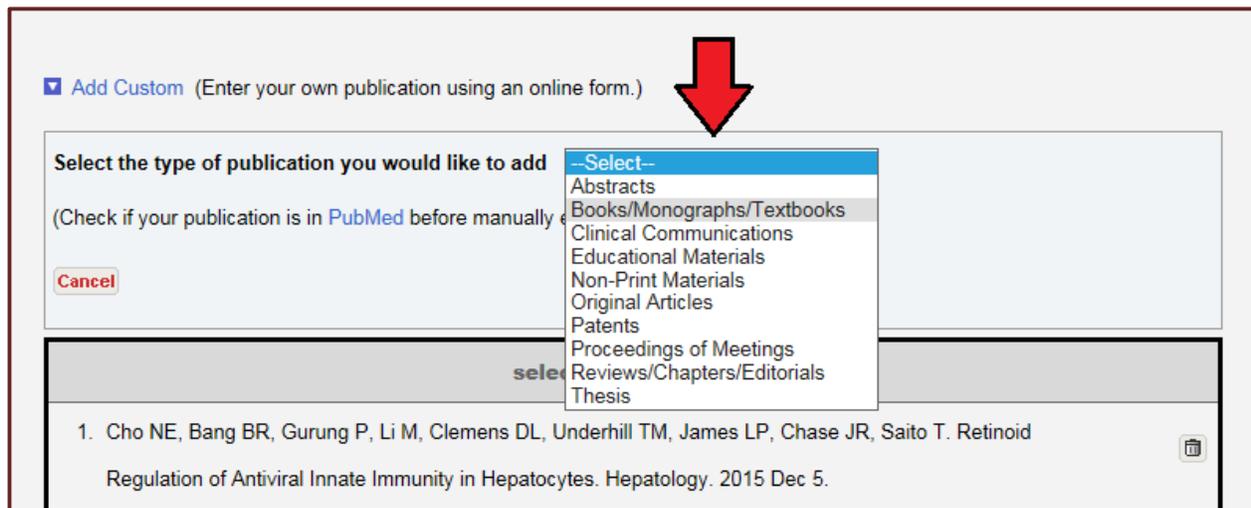

Manually added publications will automatically chronologically sort into your publication list.

To add non-PubMed publications, click on the Add Custom link.

A menu will populate that will prompt you to select which type of publication you would like to add. Click on the dropdown menu and select the appropriate publication type.

The provided example will follow the edit process for adding a Book/Monograph/Textbook.

Once you select the appropriate publication type, fields will populate that will allow you to add information about the publication you are adding. Fill out the appropriate fields and click on the Save and add another link to add more than one, or click on the save and close link to finish.

Add Custom (Enter your own publication using an online form.)

Select the type of publication you would like to add Books/Monographs/Textbooks ▾

(Check if your publication is in [PubMed](#) before manually entering it.)

Author(s) Enter the name of all the authors as they appear in the publication.
